

**LRT-2240 Partnering
Opportunity Tracker**

Loblolly Ridge Therapeutics

Effective date	2026-09-18
Purpose	Anonymized pipeline of partnering conversations with stage and dates.
Coverage	See each dataset dictionary and summary. Missing numeric values are excluded, not zero.
Summary interpretation	Descriptive statistics of selected records only. Totals of percentages and adjustment values are not operating KPIs.
Introduction	Anonymized tracker of partnering conversations, as of September 18, 2026. Maintained by Business Development for the Chief Business Officer and the CEO. Counterparty names are replaced by codes; the key is held by Business Development.
Scope	28 conversations: 18 for LRT-2240, 6 for ex-U.S. rights to LRT-1107 and 4 for research collaborations around DP-07. These are the assets and collaborations the company is currently offering.
Anonymization	Counterparties are coded Company A, Company B and so on, with type (large, mid-size, regional or specialty pharma) and region only. Codes are stable across tracker versions.
Stage definitions	outreach – first contact made, no confidentiality agreement yet.
Stage definitions	CDA – confidentiality agreement signed.
Stage definitions	data room – data room access granted.
Stage definitions	management meeting – at least one management meeting held.
Stage definitions	paused – counterparty or Loblolly Ridge has paused discussions.
Stage definitions	declined – counterparty has declined.
LRT-2240 position	12 confidentiality agreements signed, 6 data-room accesses, 2 companies at management-meeting stage, 3 declined and 1 paused. No term sheet had been received by September 18, 2026, and indicative proposals are now expected in January 2027 rather than October 2026.
LRT-2240 position	Loblolly Ridge is open to a global license, a regional license or co-development, with a U.S. co-promotion option.
Days in stage	Days in stage run from the date the conversation entered its current stage to the extract date. Declined and paused conversations keep accumulating days, so filter them out before averaging.
Kept out of the tracker	Counterparty identities and the content of any proposals.
