

**External Partner Register
and Work Orders**

Loblolly Ridge Therapeutics

Effective date	2026-09-18
Purpose	Register of external partners (service category, GxP scope, risk tier, qualification and quality-agreement status) and all active or 2025-2026 work orders and change orders.
Coverage	See each dataset dictionary and summary. Missing numeric values are excluded, not zero.
Summary interpretation	Descriptive statistics of selected records only. Totals of percentages and adjustment values are not operating KPIs.
Introduction	Extract of the external partner register and the work order register as of September 18, 2026, maintained by Outsourcing & Procurement. It shows who does what outside the company, how each partner is risk-tiered and qualified, and what has been committed to them.
What the workbook holds	Data 1 – partner register: 44 partners with service category, country, GxP scope, risk tier, qualification status, MSA date, last audit and next audit due, quality agreement status, relationship owner and whether used in 2026.
What the workbook holds	Data 2 – work order register: 110 work orders, change orders, SOW amendments and pass-through budgets recorded since 2023, each linked to a partner, a project and, for change orders and amendments, a parent work order.
What the workbook holds	Summary – record counts and totals of committed services and estimated pass-through.
Risk tiers	Tier 1 is GxP-critical: CROs, the central lab, GLP testing facilities, bioanalytical labs, CDMOs and clinical supply. Tier 1 partners are audited before first use and every 24 months. Tier 2 partners are audited every 36 months or assessed by questionnaire. Tier 3 partners have no routine audit.
Risk tiers	The register has 14 tier 1, 16 tier 2 and 14 tier 3 partners.
Qualification status	Qualified means QA approved the partner after a documented assessment and, for GMP, GLP and CRO partners, a signed quality agreement. Qualified with conditions means approved with a dated follow-up, usually an audit within 12 months; one partner is in this status. Not required applies to non-GxP partners. Closed partners are kept for history.
Qualification status	Three partners are in qualification, including Hanlin Pharmatech as a backup API supplier for LRT-1107 (qualification batch forecast for February 2027) and Fenwick Bioanalysis as a second external bioanalytical lab.
Approval level	The approval level column records who approved each commitment under the thresholds, which include estimated pass-through: director up to \$250,000; CFO \$250,000 to \$1 million; CEO \$1 million to \$5 million; board \$5 million or more. CANOPY-1 change order 4 is pending signature and shows board as its approval level.

Commitments	97 of the 110 records are active or pending signature, with \$116.6 million of committed services. Signed Halvorsen commitments for CANOPY-1 total \$64.16 million in services, of which change orders 1 to 3 are \$4.73 million; estimated pass-through is a further \$19.55 million plus the 2026 pass-through budget of \$11.2 million.
Reading the totals	Committed services and estimated pass-through are separate columns. The Summary adds each column across every status, including closed and complete work orders, and does not net off pass-through already invoiced. Filter by status before quoting a total.
Not included	Contract rates, full contract text and pass-through invoices by site.

Dataset	Measure	Unit	Total	Mean	Records	Period start	Period end
