

**Controlled Documents and
Quality Events Workbook**

Loblolly Ridge Therapeutics

Effective date	2026-09-18
Purpose	Register of controlled documents with periodic-review status, and quality events (deviations, audit findings, supplier notifications) January 2025–August 2026.
Coverage	See each dataset dictionary and summary. Missing numeric values are excluded, not zero.
Summary interpretation	Descriptive statistics of selected records only. Totals of percentages and adjustment values are not operating KPIs.
Introduction	Register of controlled documents with periodic-review status as of September 18, 2026, and quality events opened from January 2025 to August 31, 2026. Prepared by Quality Assurance from the eQMS.
Workbook contents	Data 1 – controlled document register: 330 documents with type, GxP area, owner function, version, effective date, review interval, next review due, status, whether migrated from the legacy file share, and days past due.
Workbook contents	Data 2 – quality events: 110 deviations, audit findings, supplier notifications and change-control events with source, partner, classification, dates, CAPA flag and status.
Document statuses	The eQMS holds 330 controlled documents: 274 effective, 26 in periodic review, 17 with review overdue, 10 drafts and 3 superseded. All 17 overdue documents were migrated from the legacy file share. Days past due is zero unless the review is overdue.
Document statuses	Review cycles are 24 months for SOPs and policies and 36 months for forms and research work instructions. Periodic reviews were deferred during the August to November 2025 migration freeze. The target to clear the backlog moved from June 30 to December 18, 2026.
Event classification	Events are classified minor, major or critical. A CAPA is required for major and critical events and for repeated minor ones; effectiveness checks follow CAPA closure. Closed - effectiveness check pending means the CAPA is closed and the check is scheduled.
Event position	2025: 72 events opened (6 major, none critical); 69 closed by year end; median 39 days to close. January to August 2026: 38 opened (5 major). At August 31, 6 events were open, including one major audit finding at the backup API supplier.
Date basis	The document register is as of September 18, 2026. Quality events run to August 31, 2026, and days open for open events are counted to August 31.
Not included	Event narratives and CAPA plans.

Dataset	Measure	Unit	Total	Mean	Records	Period start	Period end
Controlled document register	days_past_due	days				2016-01-01	2026-09-18
