

Issued project status memorandum

Mesa Lantern Energy LLC | Projects and Development | 2026-09-26

This dated memorandum states the modeled authorization state of three projects at the pilot reference date. This draft is prepared for capital committee as part of Mesa Lantern Energy's initial information handoff. It describes the modeled operation at the stated date and should be read with the period and coverage of its supporting records.

Purpose and immediate use

Meter verification is approved and in progress. Sage Creek pad access remains proposed. Compressor overhaul is approved but not started. The milestone register holds the dates and budget fields associated with those states. An actual completion field should remain empty until supported by a completed milestone, and a proposed budget should not be described as incurred cost.

Project authorization

Projects and Development separates proposals from authorized work. The meter verification campaign is approved and in progress; the Sage Creek pad access improvement remains a proposal; the compressor overhaul is approved but has not started. Budget, schedule, owner, and approval date belong on milestones. A proposal may be evaluated, but its requested budget or target date is not evidence of expenditure or completion.

Decision owners

Field Operations is led by Avery Collins. Robin Vega is accountable for production accounting, Morgan Hale for asset integrity, Taylor Kim for development projects, and Casey Nolan for supply and contractor records. These assignments identify who can explain a record or approve a correction. They do not imply that one person performs every underlying field task or that another team may change a source record without its owner.

Coverage and missing values

The proposed extracts end on August 31, 2026. Production rows represent selected well-days, about 32 of 118 modeled wells per day on average, so their sums are not companywide production totals. Some meter or downtime values may be null, with a reason where available. A missing value is excluded from a numeric calculation and must never be silently treated as zero.

Record question for review

A reader should be able to name which project is proposed, which is active, and which is approved but idle without opening the milestone sheet. The sheet supplies dates and budget fields; this memorandum supplies the dated interpretation. A subsequent status change belongs in a new issue.

Review action and handoff

The committee can use the memorandum to ask what evidence is required for the next stage of each item. If a stage changes, issue an updated memorandum with a new effective date rather than rewriting this point-in-time record.

Companion extract summary

The accompanying summary is calculated from the selected records in this extract. Read its period, contributing-record count, and units before comparing values. It does not substitute for the record-level definitions and coverage limitations described above.
