

Production adjustment register	
Mesa Lantern Energy LLC	
Effective date	2026-09-26
Purpose	A selected register of corrections to daily production entries.
Coverage	See each dataset dictionary and summary. Missing numeric values are excluded, not zero.
Summary interpretation	Descriptive statistics of selected records only. Totals of percentages and adjustment values are not operating KPIs.
Introduction	A selected register of corrections to daily production entries. This draft is prepared for close reviewers as part of Mesa Lantern Energy's initial information handoff. It describes the modeled operation at the stated date and should be read with the period and coverage of its supporting records.
Purpose and immediate use	Each row preserves the original and revised value, the affected stream, a posting date, and a correction reason. Join to the daily record before applying a change. A correction after close belongs in a restatement view and should not silently alter the frozen month.
Adjustment lineage	A production adjustment points back to the original daily record, names the stream being corrected, and keeps both original and revised values with a posting date and reason. Adjustments posted after the monthly freeze belong to a restatement view. Analysts should not add both the original and revised quantity when preparing a summary; they should select a declared version of the record.
Monthly close boundary	Production Accounting freezes the monthly reporting snapshot on the tenth business day after month end. Changes after that point use a dated adjustment record rather than overwriting the frozen view. A reader comparing two months must therefore distinguish the original close from a later restatement view. The reporting period and extraction date are both necessary to interpret a number.
Record question for review	Use the daily record key to find the observation being corrected, then compare original and revised stream values. The workbook does not apply the correction automatically to the production tab. That choice belongs to a declared snapshot or restatement view.
Review action and handoff	The numeric summary is descriptive of adjustment rows and is not a net production revision unless stream, units, sign, version, and duplicate handling are applied explicitly.

Dataset	Measure	Unit	Total	Mean	Records	Period start	Period end
Production Adjustments	original_value	stream unit				2026-01-01	2026-08-31
				180,860.34	861.24	210	
Production Adjustments	revised_value	stream unit				2026-01-01	2026-08-31
				181,241.18	863.05	210	

Dataset	Field	Definition	Unit	Type	Reference
Production Adjustments	adjustment_id	Unique adjustment		id	
Production Adjustments	record_id	Daily production record key		category	
Production Adjustments	adjustment_date	Date posted		date	
Production Adjustments	stream	Corrected stream		category	
Production Adjustments	original_value	Original value	stream unit	number	
Production Adjustments	revised_value	Accepted replacement	stream unit	number	
Production Adjustments	reason	Correction reason		category
