

2026 Hurricane Season Readiness Summary

Tallowbrook Health | Facilities & Plant Operations | 2026-06-01

Readiness memo to the emergency management committee and facility leaders, June 1, 2026.
Prepared by Wesley Tran, Emergency Management Coordinator, with Facilities & Plant Operations.
Confirms readiness actions for the season running June 1 to November 30.

Summary

The four standing readiness actions for hurricane season are complete or scheduled for all six facilities and the System Service Center: generator load tests, a review of 96-hour supply par levels, ride-out team rosters and a review of patient transfer agreements. Two items remain open and are listed below with owners and dates.

Generator load tests

Owner: Kenneth Duhon, Director, Facilities & Plant Operations.

Medical Center West and Hospital Fort Bend: full-load tests completed in May; fuel tanks topped off and fuel delivery contracts confirmed.

Outpatient Pavilion West and Imaging & Therapy Stafford: tests completed in May.

System Service Center: test completed; transfer switch repair scheduled for June 12 (open item).

96-hour supply par levels

Owner: Supply Chain. Par levels for medical-surgical supplies, linen, food and water were reviewed against a 96-hour stand-alone period for both hospitals. The Stafford warehouse at the System Service Center holds the surge stock and will pre-position supplies at both hospitals when a storm is forecast to reach the area within 72 hours.

Ride-out team rosters

Owners: hospital chief nursing officers and department directors.

Team A (ride-out) and Team B (relief) rosters confirmed for both hospitals for June; rosters are refreshed monthly through November.

Clinical Engineering, Facilities and Information Services on-site staff included in the hospital rosters.

Central scheduling call center at the System Service Center will move to remote operation if the building closes.

Patient transfer agreements

Owner: Emergency Management Coordinator. Transfer agreements with receiving hospitals outside the coastal area were reviewed; one agreement is being renewed and is expected to be signed by June 30 (open item). Outpatient sites and Surgery Center Grand Parkway will close to scheduled patients ahead of a forecast landfall according to their site plans.

Open items

System Service Center transfer switch repair: Facilities, June 12.

Renewal of one patient transfer agreement: Emergency Management, June 30.

Next review

The emergency management committee will review readiness again on August 1, at the start of peak season, and after any activation.
