

Purchase Order Lines, June–August 2026

Tallowbrook Health

Effective date	2026-09-09
Purpose	Provide non-pharmacy PO lines with supplier, category, contract linkage, amounts and receipt status.
Coverage	See each dataset dictionary and summary. Missing numeric values are excluded, not zero.
Summary interpretation	Descriptive statistics of selected records only. Totals of percentages and adjustment values are not operating KPIs.
Introduction	Non-pharmacy purchase order lines dated June 1 through August 31, 2026, extracted from the ERP purchasing module on September 9, 2026 by Supply Chain. Includes blanket-order releases for contracted services.
Contents	One row per purchase order line (9,000 rows): order date, ship-to location, supplier, spend category, contract reference and agreement type, quantity, unit price, extended amount, receipt date and line status.
Coverage	All facilities and the System Service Center, including lines shipped to Surgery Center Grand Parkway under the services agreement. Pharmacy is bought through a separate wholesaler system and capital project purchase orders are managed separately; both are excluded.
Definitions and cautions	Extended amount = quantity x unit price, before tax and freight.
Definitions and cautions	Agreement type is Off-contract when no contract reference is recorded on the line; these lines have a blank contract reference.
Definitions and cautions	Open lines have no receipt date. Service releases are received when the invoice is approved, so service lines can remain open for several weeks.
Definitions and cautions	Warehouse stock is shipped to the System Service Center and then distributed; spend by ship-to location therefore understates hospital consumption.
Definitions and cautions	Approval limits apply to the whole purchase order, not to individual lines; line amounts alone do not show which approver signed.
