

Outpatient Imaging Scheduling Consolidation — Closeout Review

Project closeout. Ambulatory leadership and sponsors, April 18, 2025. Outpatient imaging scheduling for the Outpatient Pavilion West and Imaging & Therapy Stafford moved from site front desks to central scheduling.

Objectives

One phone number and one team for outpatient imaging

Consistent prep calls and reminders

Weekly access measures for every imaging schedule

Front desks focused on check-in and registration

What moved and when

Oct 2024: charter approved

Dec 9, 2024: Pavilion MRI and CT (one week late for scheduler training)

Feb 17, 2025: Stafford imaging (two weeks late; phone tree change waited on telecom vendor)

Mar 10, 2025: ultrasound and mammography at both sites

Schedulers now sit at the System Service Center in Stafford

Results

All imaging orders for both sites now enter one work queue

Reminders at 72 and 24 hours are automated for every modality

Schedulers call every patient whose exam needs preparation

Slots offered, booked and completed plus 3NA reported weekly from April

What we learned

Train schedulers on modality prep rules before go-live, not during

Telecom changes need a four-week lead time

Site staff need a clear escalation path for walk-in patients

Referring offices want one fax number and one portal queue

Open items and handoffs

Outpatient therapy scheduling to follow in FY2026 (Ambulatory Services)

Standard work document to be revised to v2.1 by June (Patient Access)

Pavilion and Stafford front desk staffing review (site managers)

Weekly access dashboard handed to Decision Support
