

Tallowbrook Health: Organization Overview

Tallowbrook Health | Strategy & Communications | 2026-08-15 | v2026.2

Tallowbrook Health is a community-governed, nonprofit health system serving west Houston and Fort Bend County. This overview is written for advisers, prospective partners and others who need a factual picture of who we are, where we operate and what we do. It reflects the organization as of August 2026.

Who we are

Tallowbrook Community Health System, known as Tallowbrook Health, is a Texas nonprofit corporation exempt under section 501(c)(3). Our offices are in west Houston.

We began as a single community hospital. Medical Center West opened in 1979, and we opened Hospital Fort Bend in Richmond in 2017 as families moved south and west.

Our outpatient sites followed the same pattern: the Surgery Center Grand Parkway in 2018, Mission Bend in 2019 and Imaging & Therapy Stafford in 2021.

We are one of 2,984 nongovernment not-for-profit community hospitals counted in the American Hospital Association's most recent national survey, which found 5,121 community hospitals in all.

Where we operate

We operate six facilities in Harris and Fort Bend counties.

- Tallowbrook Medical Center West (Harris County): 214 licensed beds, 24-hour emergency department, labor and delivery with a Level II NICU, cardiac catheterization and 10 operating rooms.
- Tallowbrook Hospital Fort Bend (Richmond): 112 licensed beds, 24-hour emergency department and 6 operating rooms.
- Tallowbrook Outpatient Pavilion West, next to Medical Center West: imaging, an 18-chair infusion center, outpatient therapy and lab draw.
- Tallowbrook Surgery Center Grand Parkway (Fort Bend County): an ambulatory surgery center with four operating rooms and two procedure rooms, owned jointly with physician partners.
- Tallowbrook Imaging & Therapy Stafford: MRI, CT, ultrasound, mammography, DEXA and physical therapy.

- Tallowbrook Urgent & Family Care Mission Bend: urgent care from 8 a.m. to 10 p.m. every day, primary care, X-ray and lab draw.

What we offer

Our clinical services are organized into seven service lines that work across our facilities, so patients can move between sites without starting over:

- Emergency & Hospital Medicine
- Surgical Services & Orthopedics
- Heart & Vascular
- Women's & Infant Services
- Imaging & Diagnostics
- Rehabilitation & Therapy
- Primary & Urgent Care

Scale and people

At the end of our 2026 fiscal year (July 1, 2025 to June 30, 2026) we employed about 3,080 people, or 2,650 full-time equivalents, including about 1,015 registered nurse FTEs.

About 790 physicians and advanced practice providers hold privileges at our hospitals. Most are in independent practice in the communities we serve.

Governance and mission

A 13-member community board governs Tallowbrook. Its Finance & Operations Committee meets monthly, and the full board approves our budget each June.

As a nonprofit, we reinvest in the communities we serve. Current programs include emergency department navigation to primary care for patients without a regular doctor, transportation vouchers and diabetes education classes at Mission Bend.

What we do not provide

We want partners to understand our limits as well as our services.

Neither of our hospitals is a Level I or Level II trauma center. Patients with major trauma are taken to, or transferred to, regional trauma centers.

We do not operate inpatient behavioral health beds. Emergency psychiatric consultation is available through a tele-psychiatry partner, and patients who need admission are transferred to area behavioral health hospitals.
