

Surgical & Orthopedic Care at Tallowbrook

Tallowbrook Health | Strategy & Communications | 2026-08-01

Whether you need a joint replaced, a hernia repaired or a same-day procedure, Tallowbrook offers surgery close to home in west Houston and Fort Bend County. This sheet explains where surgery is done, what we offer and how to prepare.

Care close to home

Surgical Services & Orthopedics is one of Tallowbrook's seven service lines. Surgeons, nurses and therapists work across our sites so your care follows you from the first visit through recovery.

Three places for surgery

Your surgeon will recommend the site that fits your procedure and health needs.

Tallowbrook Medical Center West: 10 operating rooms for inpatient and outpatient surgery, with intensive care and cardiac services on site.

Tallowbrook Hospital Fort Bend in Richmond: 6 operating rooms for inpatient and outpatient surgery.

Tallowbrook Surgery Center Grand Parkway: 4 operating rooms and 2 procedure rooms for same-day surgery, operated with physician partners.

Common procedures

Our surgeons perform joint replacement, sports medicine and arthroscopy, spine surgery, general and laparoscopic surgery, gynecologic surgery, urology and ear, nose and throat procedures. Ask your surgeon which site offers your procedure.

Before your procedure

Your surgeon's office schedules the procedure. A nurse will call you a few days ahead to review your medicines, arrival time and instructions about eating and drinking. Bring a photo ID, your insurance card and a list of your medicines, and arrange for an adult to drive you home after same-day surgery.

After surgery

Many patients go home the same day. If you stay overnight, you will recover on a surgical unit at Medical Center West or Hospital Fort Bend. Outpatient physical therapy is available at the Outpatient Pavilion West and at Imaging & Therapy Stafford.

When we refer elsewhere

Tallowbrook hospitals are not Level I or Level II trauma centers. Patients with major injuries are taken to regional trauma centers, and some highly specialized procedures are referred to academic medical centers in Houston.
