

Safety Performance Summary, January-August 2026

Sedgewater Energy Holdings | Safety, Health and Environment | 2026-09-14

Safety performance for January to August 2026 for employees and contractors of Sedgewater Electric Delivery, Sedgewater Gas Distribution and Sedgewater Services Company, with 2025 for comparison. Prepared by Safety, Health and Environment, September 14, 2026.

Headline

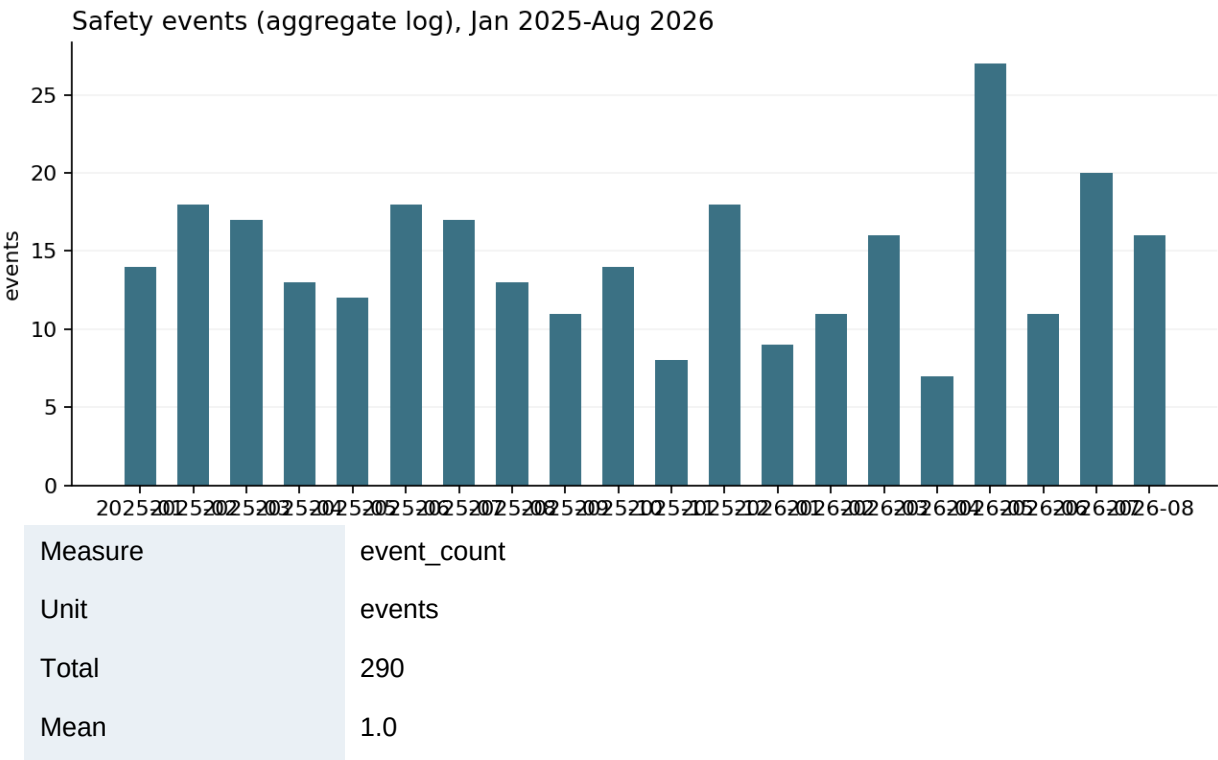

Employees had 27 recordable injuries, including 9 DART cases, in about 3.54 million hours worked, a TRIR of 1.53 against the 2026 target of 1.40. Contractors reported 34 recordables. Contractor hours for August are estimated from invoices until contractors submit certified hours, so contractor rates are provisional.

Compared with 2025

In 2025 employees had 42 recordable injuries (14 DART cases) in 5.31 million hours, a TRIR of 1.58, and contractors reported 51 recordables in 5.01 million hours (TRIR 2.03).

Events by month

The chart counts all logged events, including first-aid cases, vehicle incidents, near misses and public contacts, by month from January 2025 to August 2026.

Records	290
Period	2025-01-01 to 2026-08-31

Measure	days_away
Unit	days
Total	644
Mean	2.2207
Records	290
Period	2025-01-01 to 2026-08-31

Heat

Six heat-illness events were recorded in July and August 2026, two of them recordable. After three heat-illness cases in July 2026, one of them recordable, Sedgewater made rest breaks mandatory at a heat index of 103 degrees and added cooling trailers at district yards.

Storm response

14 safety events occurred during the May 19-26 storm response, most of them among contract line crews working long shifts in damaged areas.

Contact with energized equipment and the public

Electrical-contact events of all types numbered 14 in 2025 and 9 in January-August 2026. Public contacts with company facilities numbered 9 and 7. Work on lines and equipment follows OSHA 1910.269.

Vehicles

Vehicle incidents numbered 20 in 2025 and 13 in January-August 2026.

Contractor actions

Arrowboard Safety Services, a traffic-control contractor, was suspended on June 15, 2026 after a work-zone incident; its open work moved to Conecraft Traffic Control.
