

Field Work Orders and
Crew Hours: Bayou and
Crossroads Districts,
January-August 2026
Sedgewater Energy Holdings

Effective date	2026-09-09
Purpose	Provide work orders and weekly crew-hours for two districts to show workload, priorities and capacity.
Coverage	See each dataset dictionary and summary. Missing numeric values are excluded, not zero.
Summary interpretation	Descriptive statistics of selected records only. Totals of percentages and adjustment values are not operating KPIs.
Introduction	Workbook of field work orders created from January to August 2026 in the Bayou and Crossroads districts, with weekly crew hours for all four districts. Extracted from the work management system on September 9, 2026 for the operations review.
Sheets	Data 1 - work orders: one row per order with district, feeder, type, priority, created, scheduled and completed dates, crew type, contractor, labor hours, material cost, status and storm flag.
Sheets	Data 2 - crew capacity: available, regular, overtime and storm hours by district, crew type and week.
Sheets	Summary - formula totals of each numeric column.
Scope	Work orders cover Bayou and Crossroads only, the two districts that moved to the current WMS configuration first; crew capacity covers all four districts. Remotely completed service orders and storm restoration tickets are not work orders and are not included.
Status at August 31, 2026	9,600 orders were created from January to August: 8,911 completed, 352 scheduled, 216 cancelled, 87 awaiting material and 34 awaiting a planned outage. The 87 awaiting material are 71 transformer replacements, 9 pole replacements and 7 small new services.
Time to complete	Median calendar days from creation to completion: P1 emergency 0 days (1,711 completed); P2 same day 0 days (2,518); P3 within 10 days 7 days (3,026); P4 planned 34 days (1,656). Recorded labor was 41,185 hours and material \$8.3 million; 102 orders were storm-related.
Crew hours	In the 35 weeks to August 31, crews logged 1,008,195 regular and 112,359 overtime hours (overtime 10.0% of worked hours) against 1,074,645 available hours. 61,717 hours were charged to storms, 42,588 of them in the two weeks from May 18. Overtime share by district: Harbor 9.8%, Crossroads 10.2%, Bayou 9.9%, Prairie 10.2%.
Definitions	Priorities: P1 emergency (respond immediately), P2 same day, P3 within 10 calendar days, P4 planned. Statuses: Scheduled, Completed, Cancelled, 'Open - awaiting material' and 'Open - awaiting outage'; an order is set to an awaiting status only after the planner confirms the constraint. Crew types: internal line, troubleman, underground, contract line and contract vegetation.

Data notes

562 orders (5.9%) have no feeder code; all are streetlight work, which is logged without a feeder because the lighting network is recorded separately in GIS. Since March 2026 internal troubleman crews have handled streetlight repairs that previously went to the lighting contractor.
