

Regulatory Submissions Calendar 2026

Sedgewater Energy Holdings

Effective date	2026-09-15
Purpose	Track every 2026 submission to the PUCT, RRC, ERCOT, municipalities and PHMSA with owner, due date and status.
Coverage	See each dataset dictionary and summary. Missing numeric values are excluded, not zero.
Summary interpretation	Descriptive statistics of selected records only. Totals of percentages and adjustment values are not operating KPIs.
Introduction	Working calendar of every 2026 regulatory submission and recurring report for Sedgewater Electric Delivery and Sedgewater Gas Distribution, with owner, due date and status at September 15, 2026. Maintained by Regulatory Compliance; the data sheet is the calendar and the summary sheet counts rows.
How to use this calendar	One row per submission. Due dates are ISO dates (YYYY-MM-DD); where a rule sets a deadline, the obligation text names the rule. Company-scheduled filings say so in the obligation text. Status is Submitted, In preparation or Not started; the submitted date is blank until the item is filed.
How to use this calendar	Regulatory Compliance keeps the calendar and each row has a named owner. The calendar is reviewed weekly with Regulatory Affairs and monthly with the executive team.
Status at September 15, 2026	61 submissions are listed: 44 submitted, 14 in preparation and 3 not started. Every item due on or before September 15 has been submitted. One was late: the second-quarter gas franchise fee report for the City of Marais was submitted on August 14, two days after its August 12 due date, because of a staffing gap in revenue accounting.
Rule-driven annual dates	February 14 - annual service quality report to the PUCT. The 2025 report was filed on February 12, 2026.
Rule-driven annual dates	March 15 - emergency operations plan and executive summary (filed March 13, 2026); RRC facilities-replacement documentation and work plan (submitted March 11); PHMSA gas distribution annual report for the preceding year (submitted March 10).
Rule-driven annual dates	May 1 - vegetation management report (filed April 29, 2026) and storm hardening summary report. The vegetation management plan itself must be updated by December 31 and is retained rather than filed.
Rule-driven annual dates	Within five working days after a significant interruption lasting more than 24 hours - summary report. The report for the May 19-22 wind event was filed on May 29, 2026.
Rule-driven annual dates	January 1, 2027 - initial distribution pole management and inspection plan. The calendar carries the internal target of December 15, 2026.
Rate and cost-recovery filings	A distribution cost recovery factor (DCRF) update may be made no more than twice a year. The first 2026 DCRF, filed April 6, requested \$41.8 million of annual revenue and took effect in July; the second, of about \$23 million, is scheduled for September 28. Interim transmission cost of service updates, which reflect changes in invested transmission capital, were filed on February 27 and August 28.

Rate and cost-recovery filings	For gas, the interim rate adjustment filed on March 27 covered \$86.4 million of 2025 net invested capital and requested an \$11.2 million increase. A utility using interim adjustments must file annually and must file a comprehensive rate case by the fifth anniversary of its first filing. Monthly purchased gas adjustment reports pass gas cost changes through to customers.
Commitments under the resiliency plan order	Progress reports on the 2026-2028 resiliency plan are due at the end of June and December. The first-half 2026 report was filed on June 26.
Known limitations	The pole plan row shows the internal target date in the due-date column; the statutory deadline appears only in the obligation text. Municipal franchise fee rows follow each city's franchise terms and are grouped by quarter.
