

Safety Events Log
(Aggregate), January 2025 -
August 2026

Sedgewater Energy Holdings

Effective date	2026-09-10
Purpose	Log of safety events without personal data.
Coverage	See each dataset dictionary and summary. Missing numeric values are excluded, not zero.
Summary interpretation	Descriptive statistics of selected records only. Totals of percentages and adjustment values are not operating KPIs.
Introduction	Aggregate log of safety events from January 2025 to August 2026 for employees, contractors and the public, prepared by Safety, Health and Environment. No names or injury details are included.
Sheets	Data 1 - one row per event: date, workforce, business, district, event type, cause category and days away from work.
Sheets	Summary - formula totals; the event count column sums to the number of events.
Event types	Recordable injury and DART case (days away, restricted or transferred) together make up recordables. First aid, vehicle incidents, high-potential near misses and public contacts with company facilities are logged for learning and trend purposes. Days away are recorded only for DART cases.
2025	Employees had 42 recordable injuries, including 14 DART cases, in 5.31 million hours worked, a TRIR of 1.58. Contractors reported 51 recordables in 5.01 million hours (TRIR 2.03).
2026 to August	Employees had 27 recordable injuries (9 DART cases) in about 3.54 million hours, a TRIR of 1.53 against the 2026 target of 1.40. Contractors reported 34 recordables. Six heat-illness events were recorded in July and August (two recordable), and 14 events occurred during the May 19-26 storm response.
Other events	Electrical-contact events of all types: 14 in 2025 and 9 in January-August 2026. Public contacts with company facilities: 9 and 7. Vehicle incidents: 20 and 13.
Data notes	Two 2025 vehicle incidents involving pool cars were coded to Houston offices rather than the district where they happened.

Dataset	Measure	Unit	Total	Mean	Records	Period start	Period end
