

Sedgewater Energy Delivery: Company Overview

Sedgewater Energy Holdings | Corporate Communications | 2026-09-01

Sedgewater Energy Holdings delivers electricity and natural gas to homes and businesses in the Coastal Plain service area on the upper Texas Gulf Coast. This overview explains what we do, where we work and who we are. Information is as of June 30, 2026 unless stated otherwise.

Who we are

Sedgewater Energy Holdings, Inc. is a Texas energy-delivery holding company headquartered in Houston. It owns Sedgewater Electric Delivery, LLC, Sedgewater Gas Distribution, LLC and Sedgewater Services Company.

The holding company was formed in 2002, when Texas electric restructuring separated its predecessor's generation and retail businesses. Texas law required integrated electric utilities to separate into a power generation company, a retail electric provider and a transmission and distribution utility by 2002; Sedgewater kept the wires business and the gas distribution business.

What we do - electricity

Sedgewater Electric Delivery is a transmission and distribution service provider in the ERCOT region. We build, operate and maintain poles, wires, substations and meters, restore outages and process service orders. We do not generate electricity or sell it to end-use customers.

Customers buy electricity from one of 58 retail electric providers, who bill them and pay us regulated delivery charges. ERCOT operates the regional grid and wholesale market, where generators sell power and retail providers buy it; we coordinate transmission planning, outage scheduling and emergency operations with ERCOT. As a transmission and distribution service provider we are regulated by the PUCT and must provide non-discriminatory access to our system.

What we do - natural gas

Sedgewater Gas Distribution buys natural gas, delivers it through its own mains and services and bills its customers directly. Its rates are set by municipalities with original jurisdiction and by the Railroad Commission of Texas.

Where we work

Our fictional Coastal Plain service area is organized in four districts. Harbor is a port and industrial corridor with dense older neighborhoods; Crossroads is our fastest-growing suburban district; Bayou has older low-lying suburbs with heavy tree canopy; Prairie is rural and exurban with long overhead lines. Gas service covers Crossroads, Bayou and Prairie.

Scale

About 683,000 electric delivery points and 262,200 gas customers at June 30, 2026.

About 1,240 circuit miles of 69 kV and 138 kV transmission lines.

2,612 employees: 1,540 at Sedgewater Electric Delivery, 452 at Sedgewater Gas Distribution and 620 at Sedgewater Services Company.

Where our people work

About 420 staff work at our Houston headquarters and about 780 at our Houston operations center, which houses distribution control, outage management, storm command and our main contact center. Field crews report to four district service centers and three gas service centers.

Leadership

Dana Whitfield, President and CEO; Marcus Oyelaran, COO; Priya Raman, CFO; Hannah Lowell, General Counsel; Tomas Ybarra, VP Regulatory Affairs; Gareth Pruitt, VP Distribution Operations; Renee Dufresne, VP Gas Operations; Kwame Asante, VP Asset Management and Engineering; Denise Okafor, SVP Customer and Market Operations; Frank Lindqvist, VP Supply Chain and Fleet.

Building resilience

Our 2026-2028 Resiliency Plan, approved by the PUCT in October 2025, includes nine measures and about \$612 million of capital over three years. After major storms we work with other utilities through a regional mutual assistance group.
