

Contractor mobilization register Mesa Lantern Energy LLC	
Effective date	2026-09-26
Purpose	Selected contractor visits with scope, site, release state, dates, and invoice amount.
Coverage	See each dataset dictionary and summary. Missing numeric values are excluded, not zero.
Summary interpretation	Descriptive statistics of selected records only. Totals of percentages and adjustment values are not operating KPIs.
Introduction	Selected contractor visits with scope, site, release state, dates, and invoice amount. This draft is prepared for field and finance reviewers as part of Mesa Lantern Energy's initial information handoff. It describes the modeled operation at the stated date and should be read with the period and coverage of its supporting records.
Purpose and immediate use	A proposed, released, or complete status describes a different decision. Use the work-order reference where present and compare the service confirmation before matching an invoice. Blank end dates or amounts remain unresolved rather than zero.
Contractor and invoice path	Supply and Contracts records approved vendors, scope, location, mobilization dates, and invoice references. Before a mobilization is released, the field supervisor records a job safety analysis reference and readiness confirmation. After service, the supervisor confirms work performed; Supply and Contracts then matches the invoice. This modeled path keeps site release, service evidence, and payment review as separate decisions.
Coverage and missing values	The proposed extracts end on August 31, 2026. Production rows represent selected well-days, about 32 of 118 modeled wells per day on average, so their sums are not companywide production totals. Some meter or downtime values may be null, with a reason where available. A missing value is excluded from a numeric calculation and must never be silently treated as zero.
Record question for review	Filter a vendor's visits by site and dates before comparing invoice amounts. Two visits by one vendor may have different scopes. The register contains selected mobilizations and cannot prove the vendor's total business with the operator.
Review action and handoff	The summary tab cannot establish total company contractor spend. It reports only the rows supplied in this selective mobilization extract.

Dataset	Measure	Unit	Total	Mean	Records	Period start	Period end
Contractor Mobilizations	invoice_usd	USD				2026-01-01	2026-08-31
			34,018,597.76	81,775.48	416
